# MISSION

Our mission is to stand by unprivileged and socially excluded sections of the community in establishing their needs and rights in providing the required knowledge and skills. We also aim to make public health a basic human right rather than an inspiration. We are committed to create an environment that promotes gender equality through political, social and financial empowerment with active informed participation of individuals, community and state. Kindness and caring also seem to be contagious. When we see someone do something kind or thoughtful, or we are on the receiving end of kindness, It inspires us to be kinder ourselves.

# VISSION

Our vision is to improve the lives of the poor people in local communities through education, economic empowerment and social amenities together with public, private, and civil sectors. We aspire for an improved society that raises the standards of the living of the underprivileged through education, health and economic liberty.

Giving isn't just about money, so for helping it is not necessary to be rich. Kindness towards others is the glue which connects individual happiness with wider community and social well being.

# Why Choose Us
